

## Discover the Ultimate Solution for Leg Pain and Swelling

# Do Your Legs Ache Like You've Climbed Mt. Everest Every Time You Stand or Walk?

## Improve Blood Flow, Reduce Leg Swelling and Foot Fatigue In As Little As 5 Minutes!

Leg pain has many causes, from working out too hard to more severe blood flow problems. Blood flow problems, like Chronic Venous Insufficiency (CVI), mean your muscles ache because they are starving for oxygen. About 1 in 50 adults develop CVI, affecting people over 50. The likelihood increases with age, and you may end up with hideous elephant feet or sausage-like calves.

And it's not just older adults who suffer leg pains. Athletes who train hard, workers who stand all day, pilots, airline travelers, and anyone who sits for prolonged periods can experience symptoms. Compression socks might be the answer.

### What Are Compression Socks?

When the veins in your legs are damaged, or the valves in them aren't functioning properly, blood pools, causing swelling in your legs, called Edema. Compression socks help increase pressure in your leg veins and improve blood flow to your heart.

Although many compression socks are available, low-quality socks can do more harm than good!

### The Duoflex CompressWeave Difference

Cheap compression stockings use one weave throughout the socks. They are uncomfortable because they exert too much pressure in the wider areas, like calves, and not enough in others.

**CompYes! Compression Socks** use a scientific Duoflex CompressWeave design with unique weave patterns to deliver the correct compression to each area of your legs and feet.

### Perfect Fit... and Style

Most compression socks on the market are downright UGLY like they belong in a hospital. CompYes! Compression Socks look like dress socks you can wear without embarrassment.

They come in 5 sizes - **S (5-7)**, **M (6.5-8.5)**, **L (8-10)**, **XL (9.5-12)**, & **2XL (+12)**

They are a stylish way to relieve pain and achy lower legs.

### Benefits of Wearing CompYes!

There are some significant medical benefits to wearing them, such as:

- Increasing blood flow and oxygen in your legs.
- Decreasing swelling in your legs and ankles.
- Preventing blood from pooling in the legs.
- Avoiding potential blood clots.
- Improving lymphatic drainage.
- Helps to reduce leg pain and discomfort.

When people try CompYes! Compression Socks with *Duoflex CompressWeave* they experience immediate relief.

### Real Stories from Happy Customers

Customers love CompYes! Compression Socks!

*"Quality compression sock with an emphasis on compression. These socks maintain their compression for the duration of wear and aren't too tight or constricting. Perfect for my bike rides to help with circulation." - LB*

*"I recently bought a few pairs of CompYes! socks, and let me say they helped my feet so much. They were so comfortable to walk around in. And so comfortable to go running in also." - Maritza N*
